## PROFESSIONAL SUMMARY

Technology-focused ComputerScience graduate with hands-on experience in frontend development, application testing, and IT support. Proven ability to design, build, test, and support scalable web applications aligned with business requirements. Strong understanding of software development lifecycle, test methodologies, and incident management. Demonstrates ownership, adaptability, and commitment to delivering high-quality solutions in fast-paced environments.

---

## WORK EXPERIENCE

FrontendDeveloper | Robonist | Chh. Sambhajinagar |

July 2024 – August 2025

- Designed, built, tested, and configured web applications aligned with business requirements and performance expectations.
- Applied modern UI/UX principles to deliver scalable and maintainable frontend solutions.
- Created and executed test cases, testing scenarios, and test data to meet quality standards.
- Analyzed defects, documented observations, and collaborated with teams for resolution.
- Participated in peer reviews to ensure code quality and adherence to best practices.
- Supported application operations, enhancements, and issue resolution in production-like environments.
- Demonstrated ownership of deliverables from analysis through implementation.

---

## TECHNICAL SKILLS

- **Languages and Web Technologies:** HTML, CSS, JavaScript, React, PHP, Tailwind CSS, Bootstrap
- **Testing and QA:** Functional Testing, Usability Testing, Test Case Design, Defect Reporting
- **Tools and Platforms:** Git, GitHub, ServiceNow, Firebase
- **IT Operations:** Incident Management, Active Directory, SLA Handling, Remote Support

---

## KEY SKILLS

- Application Design, Development & Testing with strong focus on Business Requirement Analysis and end-to-end solution implementation.
- Functional Testing, Usability Testing, Test Case Creation, along with Automation Basics & Debugging to ensure quality and reliability.
- Incident Management & Production Support, including issue analysis, resolution, and maintaining SLA expectations in live environments.
- Peer Code Reviews & Quality Assurance with strong communication, analytical, and problem-solving skills to deliver high-quality code.

---

## PROJECT EXPERIENCE

INTERCODE – MCQ Test Platform

[Link - INTERCODE](#)

- Developed a role-basedwebapplication supportingadminanduserworkflows.
- Designed testing scenarios for functional and usability testing.
- Prepared test reports and analyzed results to improve application reliability.
- Ensured system stability, data accuracy, and user experience.

---

## EDUCATION

- B.Sc.inComputer Science – Deogiri College
- FullStack Webdeveloper certificate (Geekster)
- Infosys JAVA Essential Certificate
